

ASSIGNMENTS

To keep a note of all your assignments for your classes, it is convenient to track them in a single space. You will find assignments for *all* registered classes here, and this space is different from the class-specific **Assignments** section.

Clapp's LMS platform creates a detailed inspection, grading, and feedback system for each assignment. For any assignment, enter its assignment details for this functionality.

Sort these assignments using flags to increase organization:

1. Upcoming
2. Draft
3. Pending
4. Reviewed
5. Completed

Browse

Browse through the list of assignments and view statistics about student submissions and view the number of submitted and pending assignments from its quick view.

Assignment Details

To inspect these student submissions individually for an assignment, select its 'Submissions' section. This presents a detailed view of each assignment. You can inspect, grade, and provide feedback here.

NOTE: To create a new assignment, you must enter the target class and create one within its own **Assignments** section.
