

SETTINGS

Theme

Change the theme for your Clapp platform. Check out the custom hues and change the primary and secondary themes to enhance your experience!

On demand save

Check this option to see the save button on lesson menu bar. This option is particularly helpful when you are creating long lessons. Click this button as soon as you are satisfied with portions of a lesson that you are creating. If you choose to not save a lesson when exiting, you will still retain portions you saved by on demand save.

Noise Reduction

Enable automatic noise reduction to clear white noise from your lesson. Please note that this option is NOT suitable to record music. Disable this option if you are going to record music in your lesson.

Whiteboard Video

This option allows you to record Clapp whiteboard as MP4 while you are creating lessons. Whiteboard videos are saved on your device under \Clapp\MyLessonVideos folder.
